

1. Introduction

Under the U.S. Drug Supply Chain Security Act (DSCSA), all trading partners involved in the pharmaceutical supply chain must exchange product compliance information for prescription drugs – making it easier to protect patients from suspect or illegitimate drugs. The full set of enhanced drug distribution security requirements are in effect as of November 27, 2024.

Sanofi has partnered with two third-party providers, Antares and LedgerDomain, to launch digital web portals for DSCSA compliance. This document outlines the step-by-step instructions for establishing customer connections into these portals.

Activity	What to Use
Access serialization data for drug packages	Antares Portal
Submit a verification request	LedgerDomain Portal
Submit a trace request	LedgerDomain Portal

2. DSCSA Portal for Serialization Data (Antares)
